This document describes the configuration format for use with Autodesk CAM Post Processor.

## Attention

Wrong NC programs can result in severe damage to CNC machine, machined part, and/or bodily injury. All programs must be verified before use.

## Technical Support

Please contact us using the e-mail address for the corresponding CAM solution for support issues or feature requests related specifically to the post processor. Problems related to other products using the post processor should be redirected to the appropriate support channels for these products.

E-mail for all users: [cam.posts@autodesk.com](mailto:cam.posts@autodesk.com)

You can also report problems to us at this address. Please include the configuration script, intermediate NC file, and NC output file in a ZIP-archive with a description of the problem.
